

keos finance

data driven analytics

The exclusive club developed to match the financial requirements of businesses with those of investors and lenders

Our services

Search of investors

Keos Finance structures operations in order to seek investors for those who want to sell the company, or for those seeking capital from investors for company development or restructuring operations.

Search of businesses

Keos Finance carries out analyses and structures operations for those who, looking for new investment and growth opportunities, are looking for companies to invest in (investors) or companies to finance (lenders).

Search of lenders

Keos Finance structures financial operations for those looking for financing, coming from the ordinary, alternative and/or subsidized channel, necessary for development and growth operations

How it works

1. Free registration on the platform

Keos Finance structures the operation finding the match between those seeking capital and those offering capital.

Those who need:

1. Search for investors
 2. Search for companies to invest in or finance
 3. Search for lenders
- you will have to register for free on the digital platform and indicate your financial needs in your user profile.

2. Analysis of the need and search for the solution

Based on the financial need described in the user profile (search for investors, search for companies to invest in or to finance, search for lenders) Keos Finance will structure the operation in order to find the solution thanks to the use of proprietary algorithms and the community network.

3. Matching and concluding the deal

Keos Finance also guides the user to the solution by searching for matches among the various players (businesses, investors, lenders)

The advantages of choosing Keos Finance

Businesses and consultants

Free registration on the K-Platform and the option to describe the company's financial requirements to find a possible match with the financial requirements of the investors or lenders

The possibility of analysing the projects on the K-Platform at no cost

Obtaining a free preliminary analysis from an economic, equity and financial point of view of the company and the key commodity sector

Forging contacts with investors and lenders at the national and/or international level (for example, with banks, funds, other operators etc.) more rapidly and at lower costs

Improvement of the business's information flows to third parties

Investors and lenders

Free registration on the K-Platform and the option to describe the company's financial requirements in order to find a possible match with the financial requirements of companies

The option of analysing the projects on the K-Platform at no cost

The option of data analysis activities for finding potential target companies in which to invest

Forging contacts with businesses more rapidly and at lower costs

The option of performing due diligence activities to conclude an operation more rapidly

Who we are

Keos Finance is a fintech financial consultancy company created by bringing together experts in finance, data science and IT who, in an innovative way, aim to provide services in the field of corporate finance to businesses, investors and lenders in order to structure operations for the search and use of capital, by focusing on:

1. personalised consultancy
2. data analysis
3. the club network

Keos Finance has developed in-house both the data analysis algorithms capable of analysing businesses and commodity sectors and a digital platform that facilitates the flow of information between businesses and potential investors and lenders, making it possible to:

1. obtain personalised and specialised consultancy
2. save costs and time, enhancing the added value of the human capital
3. select the best financial solution on the market, also by matching the needs of the users who are part of the club
